CHAMBERS

An integrated approach

ENVIRONMENTAL POLICY

Chambers Waste Management PLC (CWM) will comply with, and wherever possible exceed, existing environmental and other pertinent legislative requirements at all stages of our business activities and operations.

At CWM we strive to work with our customers and manage their waste in a way that it has an impact on the environment. We are at the forefront of recycling and use all the latest technology available to produce quality recycled products and reduce the amount of waste that is landfilled. We believe this contributes greatly towards our environmental performance.

MANAGEMENT RESPONSIBILITY

The Managers at CWM will ensure that responsibility for environmental issues is clearly defined and understood throughout the company and that all activities are conducted in a manner designed to protect the environment from the risk of pollution.

CONTINUAL IMPROVEMENT

1. We are committed to providing training and information for all employees so they gain a better understanding of health, safety and environmental issues and the company's commitment, policies and programmes for protecting and enhancing the environment
2. We are committed to effectively communicating the policy to all employees
3. We are committed to using suppliers or contractors that have environmental standards compatible with our own wherever possible.
4. We plan to carry out a review at the management meetings of our services and where necessary, revise to realise our objectives with regard to this policy
5. It is our intention that all company processes will meet and comply with air, water, noise and land pollution regulations.
6. We will work to reduce office waste and maximise the use of resources, energy, water and other raw materials.
7. All waste will be handled by responsible bodies and be recycled wherever possible.
8. We will also work with these partners/customers/suppliers in the Scheme to improve public and industrial understanding of environmental problems through public relations, information and educational environmental training programmes.
9. We assign strategic and short term targets
10. We are committed to review this policy on an annual basis
11. We are committed to producing a monthly report on our recycling results/performance.
